McCall, World Analysis Branch, International Economics Division, Economics, Statistics, and Cooperatives Service, U.S. Department of Agriculture, Washington, D.C. 20250.

## DIGEST

U.S. Agricultural Exports Set \$34.7 Billion Record In Calendar Year 1979 (see p. 4). Farm product exports during 1979 totaled \$34.7 billion, 18 percent above the previous year's record. Large grain and oilseed shipments in the fourth quarter and higher prices accounted for most of the increase. Export volume reached 147 million tons, 7 percent above its 1978 rate.

U.S. Agricultural Imports Rise 13 Percent In Calendar Year 1979 (see p. 60). U.S. agricultural imports totaled a record of nearly \$17 billion in 1979, 13 percent above the value in 1978. Competitive products--mainly beef and veal, vegetable oils, sugar, fruit and fruit preparations, hides and skins, and malt beverages--caused most of the gains.

U.S. Agricultural Exports Under Public Law 480 Rise In Fiscal Year 1979; AID Programs Decline (see p. 85). Rising prices caused U.S. agricultural exports under Public Law 480 to total \$1,137 million in fiscal year 1979, 6 percent above the 1978 value. However, a decline in disbursements under AID programs more than offset the value gain in P.L. 480 shipments.

Exchange Rate Differentials Since 1970 (see p. 87). The difference in currency prices between countries with appreciating currencies and those with depreciating currencies has widened considerably since 1970. This difference in exchange rates in relation to the dollar resulted in dissimilarities in how foreign countries perceive U.S. export prices.

Selected Prices Of International Significance (see p. 97). International agricultural prices continued strong in December, with upward movements for wheat, rice, cotton, coffee, beef, sugar, cocoa beans, and rubber. December corn prices remained steady, while soybean and coffee prices declined. Calendar year 1979 export unit values advanced 13 percent, while import unit values averaged 11 percent higher.

## U.S. AGRICULTURAL EXPORTS SET \$34.7 BILLION RECORD IN CALENDAR YEAR 1979

U.S. farm product exports totaled a record \$34.7 billion during calendar year 1979, 18 percent above last year's \$29.4 billion value. Large grain and oilseed shipments in the fourth quarter--coupled with sharply higher prices--accounted for most of the gain.

Export volume for principal agricultural commodities reached 147 million tons and exceeded 1978's rate by 7 percent. Feedgrain and cotton increases contributed to the growth in tonnage.

The agricultural trade surplus for 1979 widened to a record \$18 billion, as export gains outpaced imports. Monthly trade surpluses of over \$2.2 billion were achieved in October and November 1979.

Sharp increases occurred in shipments to centrally planned areas (communist controlled countries), especially during the October-December quarter. Exports to East European countries were up 75 percent in value over 1978's pace, and those to China jumped 73 percent. Agricultural exports to the U.S.S.R. totaled more than \$2.8 billion, 69 percent above last year's value.

Feedgrain exports in 1979 totaled more than 65 million tons, up 17 percent from 1978's 56-million-ton level. Higher prices pushed export value up 32 percent to \$7.7 billion. Corn shipments, the primary feedgrain component and the largest foreign exchange earner among agricultural exports, established a 59-million-ton record valued at \$7 billion. Principal feedgrain export markets in 1979 included the U.S.S.R., Japan, Korea, Taiwan, China, Brazil, Spain, Portugal, and Eastern Europe.

Wheat's export volume declined slightly from 1978's 34-million-ton level, but its value jumped 21 percent to almost \$5.3 billion. Leading destinations in 1979 shifted from Africa, South America, and Western Europe to the U.S.S.R., Eastern Europe, and Mexico. The U.S.S.R. imported over 5.3 million tons of U.S. wheat in 1979, compared to 2.9 million tons in 1978, as a result of last season's poor harvest. U.S. shipments to the U.S.S.R. were large from June onward, especially following settlement of the 82-day Duluth-Superior grainhandler's strike in late September.

The third largest farm product shipped abroad during 1979 was soybeans. In volume terms, soybean exports remained comparable to 1978's; but higher prices yielded \$5.7 billion or 9 percent more than in the previous year. Shipments to the U.S.S.R. doubled, and exports to China jumped sharply. Korea and Taiwan remained strong markets. Soybean exports to Spain, Italy, and France also increased. However, offsetting volume declines occurred in movements to most other West European countries, Japan, and Mexico.

Soybean meal exports in 1979 totaled over 6 million tons, while value advanced 14 percent to \$1.4 billion. Increased shipments to most European countries, Canada, and Latin America more than offset declines to other destinations.

Foreign demand for U.S. cotton expanded last year. Export volume jumped 13 percent to over 1.5 million tons, and higher prices pushed value gains up 26 percent. Japan moved ahead of Korea in 1979, as cotton shipments to Japan rose and Korea took less than in the previous year. Cotton exports to China registered sharp increases.

Table 1--Agricultural, nonagricultural, and total trade balance

Item	January-December		December

1/ PRELIMINARY

2/ UNOFFICIAL CENSUS DATA

## U.S. AGRICULTURAL IMPORTS RISE 13 PERCENT IN CALENDAR YEAR 1979

U.S. agricultural imports totaled a record of nearly \$17 billion in calendar year 1979, 13 percent above the 1978 total. Competitive products--mainly beef and veal, vegetable oils, sugar, fruit and fruit preparations, hides and skins, and malt beverages--were responsible for most of the gain. December imports of \$1.6 billion reached a monthly record, mainly due to large gains in coffee.

Noncompetitive imports totaled about \$7 billion in 1979, slightly higher than the total last year as a large increase in rubber offset value declines in cocoa beans and cocoa powder. Green coffee imports, at \$3.8 billion, were 3 percent higher than last year, but 7 percent higher in volume due to lower prices during the first half of the year. Coffee import prices, which have risen steadily since last June, reached \$1.82 a pound in December, about one-fourth higher than the price in December of 1978 and nearly one-fourth more than the yearly average price of \$1.50 per pound. Traditionally the United States imports green coffee from over 30 countries, but in 1979 four countries--Colombia, Brazil, Mexico, and Indonesia--supplied half the U.S. total. All major suppliers except Brazil, Ecuador, Honduras, Zaire, and Uganda increased their exports to the United States in 1979.

Price increases caused dry rubber, the second leading noncompetitive import, to register a value gain of about one-third as the quantity barely increased. Slightly over half the rubber imported came from Indonesia; the remainder came mostly from Malaysia.

Cocoa beans, the third leading noncompetitive import, declined nearly 17 percent in value and 21 percent in volume as prices increased. Major 1979 suppliers were the Ivory Coast, 25 percent; Brazil, 18 percent; the Dominican Republic, 15 percent; and Nigeria and Ghana, about 10 percent each. Rising prices caused value gains among such other noncompetitive imports as bananas, soluble coffee, cocoa butter, and chocolate preparations. Cocoa powder and spices experienced value declines.

Competitive product imports rose about one-fifth to reach \$9.5 billion, with all major products increasing in value except poultry and vegetables. Meat and meat product imports (over two-thirds fresh and frozen beef and veal) totaling \$2.5 billion accounted for most of the gain. Imports of fresh and frozen beef and veal rose about one-half in value but only 6 percent in quantity, owing to rising prices and reduced U.S. production. Beef and veal imports, high from March through June, fell until the last few months of 1979. Australia supplied about half of all beef and veal imports in 1979 and New Zealand about one-fifth. Imports of pork declined 5 percent in value, because of lower prices and increased domestic production. The volume of pork imported increased slightly, with unit import prices falling nearly 10 percent in 1979.

Live animal imports rose 2 percent as gains in imports of horses offset declines in dutiable cattle and swine. Cattle imports are usually heavy during the last few months of the year because of the slaughter cycle. Dairy product imports increased 18 percent, while hides and skins went up 30 percent.

Fruit and fruit preparations (mainly fruit juices and canned pineapples) increased nearly one-fifth to total \$631 million. Vegetable and vegetable preparations (principally tomatoes and olives) totaled \$790 million, slightly below last year.

Vegetable oil imports increased nearly 40 percent in value, with most of the gain in coconut oil. The quantity of vegetable oil imports declined but substantial gains occurred in unit import prices. Most coconut oil comes from the Philippines; most palm oil is supplied by Malaysia.

Sugar imports, the second leading competitive import, amounted to \$1 billion, one-third higher than the total a year earlier. Following reductions in import fees, sugar imports were relatively high in May, June, October, and November.

Traditionally, the United States imports sugar from over 35 countries, but in 1979 six countries supplied nearly two-thirds of its total imports. Brazil shipped 26 percent; the Dominican Republic, 16 percent; the Philippines, 8 percent; and Argentina, Peru, and Guatemala, about 4 percent each. Substantial declines occurred in sugar imports from the Philippines and Australia, while imports increased from most other major suppliers in calendar year 1979.

Malt beverage imports registered value gains of 42 percent, and tobacco and wine rose 9 percent. Price inflation caused much of the beverage gain, while prices declined slightly for tobacco.

1/ PRELIMINARY

## U.S. AGRICULTURAL EXPORTS UNDER PUBLIC LAW 480 RISE IN FISCAL YEAR 1979; AID PROGRAMS DECLINE

Rising prices caused U.S. agricultural exports under Public Law 480 to total \$1,137 million in fiscal year 1979, 6 percent above 1978's value. <sup>1/</sup> However, the decline in disbursements under Agency for International Development (AID) programs more than offset the value gain in P.L. 480 shipments. Thus, agricultural exports under all concessional Government-financed programs of \$1,441 million in 1979 were 7 percent less than in the previous year.

Title II donations, which accounted for almost all the value gain in P.L. 480 exports, totaled \$389 million in 1979, a rise from the 1978 figure. Donations comprised one-third of all P.L. 480 exports--a record share. Exports under P.L. 480 Title I (long-term dollar and convertible foreign currency credits) totaled \$748 million, slightly higher than the total a year ago, with volume declining slightly.

Wheat (almost all under Title I) accounted for about two-fifths of all P.L. 480 exports. Other major P.L. 480 commodities included wheat flour, about 70 percent under title I; rice, all title I; soybean oil, 70 percent under title II; bulgur wheat, almost all donations; and cotton and tobacco, all title I.

Rising prices caused value to increase more than quantity for such principal P.L. 480 exports as wheat, bulgur wheat, feedgrains, blended food products, cotton, and tobacco. Rising prices also caused quantity to fall more than value for soybean oil and wheat flour.

AID disbursements totaled \$306 million, 37 percent below those a year ago. AID contributions accounted for about 20 percent of all concessional Government agricultural exports in 1979, compared with 30 percent in 1978. Principal AID commodities included corn, soybeans, inedible tallow, and tobacco.

---

<sup>1/</sup> More detailed data on Government, commercial, and total U.S. agricultural exports will be featured in the March/April 1979 issue of FATUS.

--- = Not applicable.

1/ Preliminary.

2/ May be undervalued due to a change in accounting for Israel.

3/ Mainly feedgrain products, sorghum grits and peanut oil.

4/ Mainly cottonseed oil, oilcake and meal and seeds.

5/ In grain equivalent.

## EXCHANGE RATE DIFFERENTIALS SINCE 1970

The difference in exchange rates in relation to the dollar has meant that U.S. commodities, selling at higher dollar prices than in 1970, cost only moderately more in countries with appreciating currencies, but quite a bit more in countries with depreciating currencies.

Internationally, the dollar price for wheat, corn, and soybeans in importing countries is higher than the U.S. export price of these commodities because of transportation and other marketing costs. Countries with appreciating currencies have seen wheat's import price increase. However, their own currency price increases have not been as pronounced because of currency realignments. Japan, the Netherlands, and West Germany, which have had appreciating currencies since 1970, have benefited from currency realignments.

U.S. Gulf port commodity prices (real prices deflated by the U.S. consumer price index) are well above 1970 levels; but import prices in real terms for Japan, the Netherlands, and West Germany have fallen sharply since 1970. Japanese import prices for wheat, for example, increased only 21 percent from 1970 to 1978; but prices in real terms declined nearly one-half.

Soviet grain purchases represented a special case in the seventies, as that country sold gold in the world market to finance grain purchases. In 1972, when the Soviets made their first large grain purchases of this decade, a ton of wheat was priced the same as 1.6 ounces of gold. By 1978, it was the same as only 0.6 ounces of gold, reflecting increases in gold prices.

### Countries With Depreciating Currencies

The United Kingdom had a weakening currency in relation to the dollar between 1970 and 1978. Thus, import prices at United Kingdom ports have increased slightly faster than prices for the same commodities at U.S. Gulf ports. But the United Kingdom also experienced rapid price increases after joining the European Community (EC) in 1973. United Kingdom grain users went from paying no import tax to paying a levy that was about equal to the import price of grain itself.

The Philippines, Korea, Nigeria, Portugal, Italy, Mexico, Greece, Indonesia, Canada, and Brazil are other countries whose currencies have weakened in relation to the dollar. Import prices in those currencies have also increased faster than the U.S. export price.

The problem of rapidly increasing import prices has been partially offset by the P.L. 480 program whereby long-term loans are made to countries purchasing U.S. agricultural commodities. Moreover, many countries provide subsidies on imported products. Brazil, for example, subsidizes the purchase of imported wheat for its millers.

### Net Impact on International Commodity Prices

The trade weighted index of foreign costs for U.S. wheat has risen nearly 50 percent since 1970 because of the mix between appreciating and depreciating currencies. Soybean prices have declined more than 20 percent since 1970. <sup>1/</sup> The trade weighted index of foreign costs for U.S. corn in 1979 remained at its 1970 level.

## Consumer Prices

Do changes in international commodity prices carry through to the consumer? Raw materials represent only a small share of the retail price for bread, flour, vegetable oil, and margarine. Cooking oil and margarine prices increased more slowly in West Germany and the Netherlands than in the United States. Japanese retail prices for margarine have also increased more slowly than U.S. retail prices, which indicates that the saving attributable to currency realignment could have been passed on to the consumer. Consumer prices for livestock products are further removed from the import prices of basic commodities. Between 1970 and 1978, U.S. consumer prices for meat, milk, and eggs rose less than retail prices in nearly every country except West Germany.

These price advantages are not always passed on to the consumer because the countries' marketing systems or Government programs often build in additional costs. The EC has an extremely protected grain market, and its Common Agricultural Policy must always be taken into account when West Germany and the Netherlands consider effective import prices. Japan has the Japanese Food Agency, which purchases imported wheat and resells the wheat at a higher price to millers. The steady climb in Dutch, West German, and Japanese wholesale prices for flour and retail prices for bread, bear little relation to the sharp peaking of wheat prices in 1974 and their subsequent decline. Wholesale corn prices have continued to climb, while import prices peaked in 1974 and then declined.

Retail prices for white bread have increased faster in the appreciating currency countries of Japan, West Germany, and the Netherlands than they have in the United States as a result of markups in the intermediate market and government intervention. Japan may have kept bread prices very high to discourage increased consumption. However, wheat flour prices in Japan have increased less than wheat flour prices in the United States.

Retail prices for white bread, white flour, macaroni, cooking oil, and margarine in such less developed countries as the Philippines, Mexico, Korea, Brazil, and Indonesia all increased faster than consumer prices for these same products in the United States. Food prices in the less developed countries have consistently risen faster than U.S. retail food prices since 1970.

When retail prices for these food items were deflated by the consumer price indexes, a distinct division between countries with appreciating currencies and depreciating currencies was no longer evident. The United States and Mexico were the only countries under study whose white bread prices had risen less than the overall Consumer Price Index. Mexico, Japan, West Germany, and Indonesia had stable or declining real consumer prices for wheat flour. Again, Japan and West Germany had currencies appreciating against the dollar. Real consumer prices for margarine and cooking oil in every major importing country declined or rose more slowly than in the United States.

## SELECTED PRICES OF INTERNATIONAL SIGNIFICANCE

International agricultural prices continued strong in December 1979, with upward movements for wheat, rice, cotton, beef, sugar, cocoa beans, and rubber. Corn prices remained steady, while soybean and coffee prices declined.

The December U.S. Gulf ports' price for wheat moved up to \$5.01 per bushel. Strong export demand for U.S. wheat (owing to a reduced 1979 world wheat crop) buoyed prices, despite the large U.S. harvest. However, new crop shipments from Argentina and Australia are expected to depress prices somewhat.

The record U.S. corn harvest (7.76 billion bushels) was outweighed by the effect of strong export demand on international corn prices. The Gulf ports' price for corn remained steady at \$3.07 a bushel in December.

U.S. soybean output, at 2.27 billion bushels, was 20 percent larger than last year's crop. U.S. export prices for soybeans slipped to \$6.91 a bushel. Rotterdam's December price for soybean meal rose to \$254 a ton. Rice prices remain strong as a result of crop shortfalls in several producing countries. Thailand's rice prices, averaged \$378 a ton, up about 4 percent over November 1979.

Cotton prices have remained strong despite a sharp recovery in U.S. production which reached 14.9 million bales in 1979. The Osaka price, at 78 cents a pound, has been buoyed by increased exports to China (1.5 million bales since August), transportation tieups, and inclement weather.

Imported beef prices rose nearly 4 percent to \$1.42 a pound in December. U.S. prices have strengthened as a result of the sharp decline in the number of cattle in U.S. feedlots and increased consumer demand for beef.

Coffee prices dropped to \$2.02 a pound, while the cocoa bean price recovered from a temporary decline in November. Prices for both commodities had been slipping since September. Reports indicate that Brazil is lowering coffee prices to stimulate sales. The Ivory Coast, in contrast, is stockpiling cocoa beans to counteract the influence of its large crop supplies on international prices.

Sugar prices strengthened upon news of a 1979 crop shortfall. Crops in Thailand and the U.S.S.R. were lower due to dry weather, and hurricanes damaged Caribbean crops.

The New York spot price for rubber increased in December. Wheat, corn, sorghum, rice, soybean meal, beef, sugar, and rubber prices were substantially above last year's. However, soybean, cotton, coffee, and cocoa bean prices were lower. The Dow Jones commodity spot price index, reflecting changes in these commodity prices, was 8 percent higher than in December 1978.

### Calendar Year Export and Import Unit Values Higher

Calendar year U.S. export prices for major agricultural commodities were 13 percent higher than in 1978. Wheat, corn, sorghum, and their byproducts made especially large price gains, reflecting strong export demand. Rice, however, was priced 10 percent lower than a year earlier (table 33). Soybeans, soybean oil and soybean meal prices averaged 9 percent higher. The cotton export unit value rose 10 percent in response to last year's reduced U.S. cotton supplies. Prices also rose for cattle hides and inedible tallow, but declined for nonfat dried milk.

Import prices for major agricultural import commodities averaged about 11 percent higher than in 1978. Coffee, our largest agricultural import item, was priced 4 percent lower, but sugar and cocoa beans were up 9 and 5 percent, respectively. Palm and coconut oils were also priced higher, following composite vegetable oil prices. Cattle and beef import prices followed domestic prices upward and made especially large gains, but canned ham prices declined slightly.

### Economics, Statistics, and Cooperatives Service

The Economics, Statistics, and Cooperatives Service (ESCS) collects data and carries out research projects related to food and nutrition, cooperatives, natural resources, and rural development. The Economics unit of ESCS researches and analyzes production and marketing of major commodities; foreign agriculture and trade; economic use, conservation, and development of natural resources; rural population, employment, and housing trends, and economic adjustment problems; and performance of the agricultural industry. The ESCS Statistics unit collects data on crops, livestock, prices, and labor, and publishes official USDA State and national estimates through the Crop Reporting Board. The ESCS Cooperatives unit provides research and technical and educational assistance to help farmer cooperatives operate efficiently. Through its information program, ESCS provides objective and timely economic and statistical information for farmers, government policymakers, consumers, agribusiness firms, cooperatives, rural residents, and other interested citizens.
